Continuation Sheet

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Applicant's representative discussed that the prior art of record Plantinga et al. (U.S. Patent No. 3,043,301) and Thompson (U.S. Patent No. 4,649,909) was not analogous art since they disclose medical bandages and Applicant's invention is directed to a disposal cutting sheet/board used to cut food with. The Examiner pointed out that Applicant was not claiming a cutting sheet/board merely a single use processing substrate which can be anything.

The Examiner suggested that Applicant amend the preamble language to recite something similar to a disposable cutting sheet/board. The Examiner also suggested amending the claim clarifying that each portion or means is a distinct layer, clarifying the order of the layers, and clarifying that the layers are disposed on one another. The Examiner also recommended adding that the liquid permeable thermoplastic film was cut resistant.
